

**ENERGY RECOVERY FACILITY, CARDIFF**  
**M.R. SITE SERVICES LIMITED**

M.R. Site Services has supplied and installed outer soakers including aluminium site welding to the Cardiff Energy Recovery Facility (ERF) which is the largest ERF in Wales, treating waste from a number of local authority and local business contracts.

This facility handles 350,000 tonnes of residual waste (non-recyclable) per year. It diverts at least 95 percent of South Wales' residual waste away from landfill and generates 30MW for the national grid – enough to power around 50,000 households.
