

EXHIBITION CENTRE LIVERPOOL

M.R. SITE SERVICES LIMITED

Exhibition Centre Liverpool (ECL) is a new exhibition and event venue located on Liverpool's famous waterfront. It is the latest addition to the highly successful Arena and Convention Centre Liverpool (ACCL).

The venue has 8,100 square metres of exhibition space which can be sub-divided into three inter-linked column-free halls each 2,700 square metres which can be used separately or in combination.

The roof structure consists of a two-way spanning grillage of long span trusses each with a minimum overall depth of 3.5 metres. The roof has a 1.5 degree pitch and this is built into the grillage with varying truss depths.

For this project, M.R. Site Services supplied Quantum Walkway grillage and step overs, together with the Quantum Walkway and Handrail systems.

Quantum is a proven, low profile man-safe walkway and handrail system which allows the specifier to provide lightweight yet durable roof access for maintenance purposes on any standing seam roof.
