

Fire CPD

Steel Faced Composite Panels: Fire Engineering, Design and Testing

This CPD examines recent changes to fire legislation and how it relates to the specifier and the composite panels used within the built environment. The presentation is designed to guide the specifier through the changes to fire engineering and the move to fire risk assessment, LPS1181 and the core of a composite panel in relation to fire.

CPD includes:

Eurobond Overview
Duty of Care
Identification of Fire Performance
Changes in Legislation
Fire Behaviour of Composite Panels
ISO9705: Large Scale Fire Test
Arson

Relevant CPD Curriculum Topics

General headings: Professional context; Construction skills
Subjects: Architectural design; Sustainable architecture; Specification writing and choosing materials; Statutory requirements
Duration: 1 hour
Also available: Electronic literature
Areas covered: UK, Northern Ireland, and Republic of Ireland
