

JAGUAR LAND ROVER, KENDAL
ARCHITECTURAL PROFILES LIMITED

Architectural Profiles Limited 'Energi Envelopes™' encapsulate the range of products and systems which can, and are, regularly brought together to provide or exceed the stringent performance criteria demanded in today's construction. These include Energi Walls™, Energi Roofs™ and APL bespoke systems.

One such bespoke APL Slimwall Rainscreen system has recently been provided for a Jaguar Land Rover centre in Kendal, Cumbria where a 700 metre cantilever was constructed achieving a thru-wall U-value of 0.16.

The project demanded a special APL structural sub-frame and was supplied with a 25 year warranty on the whole system. This innovative design demonstrates the very best of true value engineering.
