

## BALLYSEEDE CASTLE, IRELAND BRETT MARTIN DAYLIGHT SYSTEMS

Brett Martin Daylight Systems has supplied a comprehensive Ritchlight skylights package for a new orangery at the majestic Ballyseede Castle in southern Ireland, helping to create a light, bright environment for guests and staff, whilst at the same time blending beautifully with the character of this stately, listed building.

Ballyseede Castle located near Tralee, dates back to the 16th century but was transformed in the 1960s into one of Ireland's most luxurious hotels.

As part of a new extension Brett Martin Daylight Systems was called upon to provide an aesthetically pleasing daylight solution for the orangery, comprising a Ritchlight Ultra skylight system.

Ritchlight Ultra is a popular, highly adaptable glazing system, providing specifiers with a versatile way to create architecturally stunning pitched skylights. It is precision-engineered and optimises natural daylight adding a touch of class to this Castle orangery.

### **Specification**
