

WAREHOUSE, MALLUSK
BRETT MARTIN DAYLIGHT SYSTEMS

In 2017 Brett Martin Daylight Systems supplied Multivault GRP rooflights to a new build, 180,000 square feet ambient warehouse which was constructed as part of a growth and expansion redevelopment at the Henderson Group headquarters in Mallusk on the outskirts of Belfast.

The new £12.5 million warehouse which incorporates cutting edge design, was designed to streamline logistics and is one of the largest of its kind in Northern Ireland.

BMDS supplied Multivault GRP barrel rooflights to cover just over 2,200 square metres or approx. 13% of the roof area - 22 runs extending over 16 metres with a further 2 runs of 8 metres streaming natural light into the group warehouse.

Specification

System: Multivault GRP Rooflights

Glazing: Trilite GRP
