

RoofDek In Construction

CPD Seminar

As the voice of authority for the structural market, Tata Steel extends its knowledge and expertise to CPD seminars.

The RoofDek in Construction CPD seminar provides an invaluable insight into the use of roof decking. It addresses the key issues to be considered when specifying a structural roof deck:

- Spanning
- Cantilevers
- Health and Safety implications
- Acoustics

It also looks at:

- Construction issues
- Diaphragm design
- Sustainability and environmental impact
- Case study examples
