INNOVATIONS IN METAL ROOF SYSTEMS

This 30 minute CPD provides a short introduction on the evolution of aluminium standing seam roof systems in the United Kingdom from the early 1980s and the increasing sophistication of aluminium roof site welding techniques now used worldwide.

The presentation looks at the following:

- Aluminium roof site welding techniques
- The design and manufacture of aluminium walkway and handrail systems, access hatches and doors; manufacture, installation and welding of soakers; snow and ice guards and access hatches and doors.
- Specification guidance
- Installation best practice
- Testing and inspection regime
- Innovative design
