

**TECHNICAL COLLEGE, AYRSHIRE  
BRETT MARTIN DAYLIGHT SYSTEMS**

Ayrshire Technical College required replacement of their rooflights which are positioned over engineering workshop areas. The designated areas required good levels of light but with high quality transmission and insulation.

The college needed a solution that was easy to install and so project time was managed to ensure minimal noise and disruption.

A series of Multivault GRP vaults were installed covering an area of approximately 800 square metres, or 15% of the total roof area, providing an economic and yet highly effective daylighting solution.

## Specification

System: Multivault GRP  
Size: Variable  
Glazing: Multivault GRP triple skin  
Roofing contractor: Hugh L S Mc Connell
