

SUPERMARKET, WORCESTER
GUTTERCREST LIMITED

A newly built supermarket in Worcester has fitted aluminium fascia and soffit from Guttercrest. Co-op has invested £500,000 in building the Barker Street store on the disused car park of a public house.

Aluminium fascia and soffit are uniquely designed, specified and fabricated for individual projects. They can be wrapped as a cladding around a concealed gutter, have an external gutter or can be a stand-alone soffit and fascia.

In this case, a combined fascia and soffit was used with external gutters. Venting was incorporated into the soffit to allow a flow of air into the roof area.

Vented aluminium soffit with fascia

Guttercrest's aluminium fascia and soffit systems can be finished in a wide range of colours and finishes including a textured heritage finish, stone effect and metallic anodised effect coating.

Aluminium is a strong, light and versatile material for fascia, soffits and guttering. Easy to install and customisable to any project, Guttercrest's aluminium rainwater goods are all manufactured at their 65,000 square feet Shropshire facilities, with delivery directly to site.
