

**ECO FRIENDLY HOMES, ALDEBURGH**  
**GUTTERCREST LIMITED**

A collection of luxury eco-friendly holiday homes has been fitted with Guttercrest's aluminium rainwater hoppers and downpipes.

Brick Kiln's nine detached homes are located on rising ground at the end of a quiet lane on the site of Aldeburgh's former brickworks. The properties overlook meadowland on the River Alde estuary which enjoys one of the highest conservation protections under international treaty, as well as being within Suffolk Coast & Heaths Area of Outstanding Natural Beauty.

A clear design objective for the homes was to make them as ecologically friendly as possible, with features including sedum flowering plant roof coverings and energy efficient air source pumps. Guttercrest's aluminium gutters, downpipes and hoppers were an ideal choice for an eco-friendly rainwater solution to fit the design objective.

Guttercrest's aluminium rainwater goods have a long life expectancy, in excess of 60 years - enhancing the whole of life embodied energy figure relative to materials with shorter life spans. Aluminium is amongst the most environmentally friendly metals on the planet, with 75% of all aluminium ever produced still being recycled.

The rectangular aluminium rainwater hoppers are used alongside 100mm square aluminium downpipe and 100mm square box gutter, all coated in a matt black (RAL 9005) polyester powder finish.

Available in a wide range of colours and finishes, Guttercrest manufacture all of their products from their 65,000 square feet Shropshire factories and deliver direct to site.
