

GUIDANCE DOCUMENT NOTIFICATION

Guidance document GD 26 *Aluminium fabrications and flashings: best practice design and fixing guide* is currently under review.

For the latest advice please refer to guidance document GD 26A *Aluminium fabrications and flashings – interim guidance*

The MCRMA intends to re-publish guidance document GD 26 on the design and installation of aluminium fabrications once the research is complete. This will be published via the MCRMA website.

MCRMA member companies can advise on the suitability and performance of materials, systems and assemblies to ensure that aluminium fabrications and flashings are calculated properly and specified accordingly. In addition, design information can be obtained from any of the independent roofing and cladding inspectors featured on the MCRMA web site at www.mcrma.co.uk

DISCLAIMER

Whilst the information contained in this publication is believed to be correct at the time of publication, the Metal Cladding and Roofing Manufacturers Association Limited and its member companies cannot be held responsible for any errors or inaccuracies and, in particular, the specification for any application must be checked with the individual manufacturer concerned for a given installation.

Information provided by the MCRMA or contained within publications and articles which are made available in any form (mechanical, electronic, photocopying or otherwise) cannot be used or cited as a means of ensuring that a material, product, system or assembly is compliant with Building Regulations.
