## **MEDIA RELEASE**

Date of issue: 03 May 2019

## **DEDICATED COPINGS WEBSITE FOR GUTTERCREST**

Guttercrest have launched a dedicated website for their range of aluminium wall copings and cappings at [www.ali-fabs.co.uk](http://www.ali-fabs.co.uk)

Guttercrest's coping, which all comes under the Ali-Fabs brand name, includes some of the highest performing aluminium coping in the industry. The range includes Architectural Coping, the only aluminium coping system with the prestigious British Board of Agrément certification.

The new user-friendly website features dedicated pages for each of the firm's coping products: Crest Coping, Architectural Coping, Click-Fix Coping and Capping. Users will be able to explore in detail the benefits and features of each product and quickly decide which is most suitable for their own project.

The website is regularly updated with the latest case studies showing the wide range of applications the products have been used on. Everything from high-rise apartment blocks and commercial buildings to small domestic installations are displayed.

Guttercrest managing director Gary Power said: "The new website is part of a wider investment and has been designed to clearly and accurately showcase useful information about our coping range for customers to utilise."
