### RETROFIT ENVELOPE ARCHITECTURAL PROFILES LIMITED

*Before and after 'Retrofit Envelope' installation*

When the existing long term tenants of this building needed it to be extended and given a face lift, architects DMA, acting on behalf of Grovemere Property, looked to a retrofit solution manufactured by Architectural Profiles Limited to provide the least disruptive and most cost-efficient route to bring it up to date in terms of design and insulation performance.

The 'new look' building also delivered benefits to Grovemere through a stronger lease renewal position and incremental asset value.

Using AP45HR profile, both horizontally and vertically, supported on a Tritherm™ structural subframe, with 100% non-combustible insulation and fixings, the building was re-enveloped with the very minimum of disturbance to the business being carried on inside the unit.
