FIRE SAFETY FOR ALUMINIUM COMPOSITE MATERIAL – CPD SEMINAR

3A Composites will be presenting a Chartered Institute of Architectural Technologists (CIAT) - approved CPD on fire safety for aluminium composite material.

The seminar will cover a range a range of topics including the fire classifications of common materials; the current UK fire regulations; the difference between Fire Resistance and Reaction to Fire; the EN ISO 13501 classification and the various tests that contribute to it and the importance of each component to large scale fire tests.

The seminar will take place on Thursday July 9th at 1pm. If you are interested, then please email Mark.Winstanley@3acomposites.com for more details.
