SIDERISE INSULATION CPD

CAVITY BARRIERS IN VENTILATED FACADES

Our experts are by your side with a programme of CPD seminars and hands on training for the selection and application of high performance cavity barriers and fire stops.

LEARNING OBJECTIVES:

- Understanding the common different Facade types
- Principles and functionality of a ventilated facade system
- Clarity on current Regulations and Guidance
- Functional performance requirements of Cavity Barriers
- Routes to Compliance: Component testing, system testing & certification
- Important detailing for successful design and installation guidance
