

MCRMA TECHNICAL APPRECIATION COURSE

INTRODUCTORY LEVEL OF COMPETENCY

Subsequent to the theoretical and technical training on day one of the MCRMA three-day course and based on continual assessment of competency during the period of the practical aspects of days two and three of introductory training course for metal-based roofing and cladding, I wish to confirm that has an elementary understanding of the following skills

- Transfer of theoretical and technical knowledge gained during day one into the practical aspects of days two and three of the course
- Recognition and Identification of the individual elements associated with, and included in, metal-based roofing and cladding systems
- Understanding of the assembly and construction processes used
- Understanding of the purpose of the individual elements of the construction and the importance of their incorporation into the system or assembly
- The need to accurately measure distances and transfer the measurement to components which require cutting, forming or assembly
- To recognise and understand the selection of fasteners and to understand the need for different fasteners for each application
- To recognise and understand the need for the inclusion of insulation, rooflights, sealants and other component parts required to comply with industry standards and regulations
- To have a basic understanding of site H&S requirements for the tasks undertaken
- To understand the need for and the use of PPE used during the assessment period
- Have the knowledge for the safe use of hand and power tools used during the assembly and assessment period
- Have the ability to recognise the potential safety issues associated with the handling of material and the use of hand and power tools used during the assessment period

Signed..... Date.....
